

Health Reform Preventive Care Changes

UNDER THE AFFORDABLE CARE ACT:

- 1.** The health reform law includes an important new provision to make preventive care services and treatments more accessible and affordable.
- 2.** For new plans starting on or after September 23, 2010, certain basic preventive care services and treatments may be available to you at no cost and with no deductible requirement. If you are in a grandfathered plan these provisions may not apply.
- 3.** Only services and treatments that are identified by specific federal guidelines are included in this new provision. The preventive care services and treatments that may be available to you are based on your age and health plan type.
- 4.** To find out which preventive care services and treatments may be available to you, contact EmblemHealth at **1-877-411-3625** or visit www.emblemhealthreform.com for more information.
